google search

given an open browser
and I go to 'google.com'

when I find 'q'
and type 'qcon'

and I find 'btnG'
and click it

then the **title** should
be 'qcon — Results'

go to 'google.com'
find 'q', type 'qcon'
find 'btnG', click it
title should be 'Results'

```
go_to 'google.com'  
find('q').type 'qcon'  
find('btnG').click  
title.should be('Results')
```

```
go_to 'google.com'  
find('q').type 'qcon'  
find('btnG').click  
title.should be('Results')
```
